Pellet Burning
Devices.

**Wood
Fuel Pellets**

Bayou Food Fuel Pellets burn more efficiently than ordinary wood in stoves or fireplaces AND are the cleanest solid fuel-burning residential heating methods.

Follow manufactures instructions for operation and maintenance of your pellet burning appliance. All stove manufacturers advise against opening the firebox door while an appliance is operating.

Manufacturers advise removing unused pellets from the stove hopper and feed system at the end of the heating season to reduce the chance of rust, which can cause damage to the appliance. Make sure to clean the flue vent per manufacturer's instructions.

Advantages of Heating With Pellets

BURN HOTTER—HIGHER BTU

BURN CLEANER

MUCH LOWER AIR POLLUTION THAN CONVENTIONAL WOOD STOVES

CONVENIENT BAGS—EASY TO CARRY, STACK AND STORE

MUCH LOWER CREOSOTE BUILD-UP IN THE FLUE

LESS OF A FIRE HAZARD

? Can I Use Bayou Wood Fuel Pellets in My Regular Fireplace or Wood Stove?

NO USE ONLY IN AN APPROVED WOOD PELLET BURNING APPLIANCE OR INSERT.

? Why Should I Use Wood Pellets To Heat My Home?

Pellets Are More Affordable By Comparison

Annual Cost Of Pellets Can Be 2 1/2 Times Lower Than Propane

A 40 Lb. Bag Equals Approximately 2.5 Gallons Of Oil

Lower Pollution and Better For The Environment

Cleaner And Easier To Manage Than Wood

Easy To Use—Easier To Light

Dryer Than Wood

Store Bayou Wood Pellets convenient 40 lb. bags in a Dry Area.
